PROFESSIONAL SUMMARY

Third-year Computer and Information student with practical foundations in Python, object-oriented programming, data structures, and relational databases. Contributed as a front-end developer to a collaborative client web project, developing structured multi-page layouts and search indexing configurations. Seeking a Full-Stack Developer Internship to apply foundational Python and Django knowledge to backend systems and full-stack software delivery.

EDUCATION

Assiut University **Expected Graduation: 2028**

Faculty of Computers and Information — Undergraduate Student (Third Year)

Relevant Academic Coursework: Programming Fundamentals, Object-Oriented Programming (OOP), Data Structures.

PROJECTS

Al-Husseiny Contracting Company Website **2025**

Role: Front-End Developer / Contributor (Collaborative Client Project) • Stack: HTML5, CSS3, JavaScript, Font Awesome

Live Site: abdulrahman-hasanen.github.io/alhusseinycont/ • GitHub Repository: github.com/abdulrahman-hasanen/alhusseinycont

- Constructed responsive page layouts across 4 distinct site sections (homepage, corporate profile, completed projects gallery, and company articles) using HTML5 semantic elements and modular CSS3 stylesheets.
- Embedded 3 key visual and media assets—including dynamic project photography galleries, corporate overview video players, and Font Awesome icon sets—enhancing catalog presentation for visitors.
- Configured 2 essential search engine discovery files (sitemap.xml and robots.txt) within the public root directory to direct crawler indexing and optimize search visibility.

KEY SKILLS

Programming Languages: Python (Fundamentals, OOP, Data Structures, Problem Solving); Working knowledge of C, C++, Java, JavaScript, and C#.

Backend Frameworks & Concepts: Django (Foundational architecture, routing, models, and tutorial-level development); Model-View-Template (MVT) principles.

Databases & Modeling: MySQL (Relational schema design, primary/foreign key relationships, table JOIN queries).

Frontend Technologies: HTML5, CSS3, JavaScript (DOM manipulation, event handling), Font Awesome.
